

20 to 27.5 kW Generator Sets / POWERED BY DEUTZ 1011

Mounting Arrangement: Set of engine and alternator coupled directly by means of a flexible disk and mounted on a steel base frame with anti vibration mountings which ensures a vibration free standing of the generating set. The assembly is made according to EEC regulations. The base frame has an integral fuel tank with a working autonomy of approximately 8 hours. On the open set version the industrial type silencer is included and shipped separately.

Deutz Engine: Four stroke, direct injection, air cooled Diesel engine of the 1011 series manufactured with the latest technology. Its low and optimised exhaust fumes emissions comply with the strictest prevailing regulations. Low fuel and oil consumption together with low maintenance costs make the 1011 series engine an extraordinary product which allows to maintain operating costs at affordable levels. Also, its load acceptance capacity ensures
